

# TOPS

## DIVERSIFICATION 2.0

---

The Optimized Portfolio System (TOPS®) was launched in 2002 and became one of the first ETF-based asset allocation programs. The goal at its inception was simple: to provide a globally diversified investment management platform in a low cost, transparent, tax efficient manner. Over time, TOPS® has continued to evolve while keeping true to its core principles. Now, over a decade later, it has expanded from traditional asset class diversification to tax diversification, or what we call 'Diversification 2.0'. Depending upon your planning needs, TOPS® is available in Tax Favored, Tax Deferred, and Taxable solutions.

---
